

TAMARAC TURN LANE

Project Data

Site Address: Commercial Blvd. @ NW 94th Ave.
Tamarac, FL 33321

Eng. Proj. #: 6142

Project Area: N/A

Cost: \$190,000 (*Construction*)

Owner:

John E. Doherty, P.E., City Engineer
City of Tamarac
6011 Nob Hill Road
Tamarac, FL 33321
954.597.3706
JohnD@tamarac.org

Point of Contact:

*Same as owner

Key Design Features:

- Coordination with Broward County School Board for flasher relocation
- Coordination of nearby elementary school for vehicular and pedestrian traffic
- Coordination with Broward County and Florida Department of Transportation to relocate existing signalization while maintaining signal control throughout construction

Project Description:

Harris Engineering was retained by the City of Tamarac to provide bid specifications and construction documents for a new right-turn lane located on Commercial Boulevard. Harris Engineering also coordinated the project with state and county jurisdictions. The intersection was signalized, and because of the right-turn lane construction, signal poles needed to be relocated.

Harris Engineering also coordinated with the Broward County School Board since the turn lane was installed to serve a nearby elementary school and because school flasher warning signs also required relocation.
